	Application No.	Applicant(s)						
	09/651,294	KOBAYASHI ET AL.						
Office Action Summary	Examiner	Art Unit						
	Ashok B. Patel	2154						
The MAILING DATE of this communication app Period for Reply	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).								
Status								
1) Responsive to communication(s) filed on 29 No.	ovember 2004.							
2a) ☐ This action is FINAL . 2b) ☑ This	action is non-final.							
3) Since this application is in condition for allowan	ice except for formal matters, pro	osecution as to the merits is						
closed in accordance with the practice under E	x parte Quayle, 1935 C.D. 11, 4	53 O.G. 213.						
Disposition of Claims								
4)⊠ Claim(s) <u>1-14</u> is/are pending in the application.								
	4a) Of the above claim(s) is/are withdrawn from consideration.							
5) Claim(s) is/are allowed.								
6)⊠ Claim(s) <u>1-14</u> is/are rejected.	6) Claim(s) 1-14 is/are rejected.							
7) Claim(s) is/are objected to.								
8) Claim(s) are subject to restriction and/or	election requirement.							
Application Papers								
9) The specification is objected to by the Examiner	•							
10)☐ The drawing(s) filed on is/are: a)☐ accepted or b)☐ objected to by the Examiner.								
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).								
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).								
11)☐ The oath or declaration is objected to by the Exa	aminer. Note the attached Office	Action or form PTO-152.						
Priority under 35 U.S.C. § 119								
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of:								
1. Certified copies of the priority documents have been received.								
2. Certified copies of the priority documents have been received in Application No								
	3. Copies of the certified copies of the priority documents have been received in this National Stage							
application from the International Bureau (PCT Rule 17.2(a)).								
* See the attached detailed Office action for a list of the certified copies not received.								
Attachment(s)								
1) X Notice of References Cited (PTO-892)	4) Interview Summary	(PTO-413)						
2) Notice of Draftsperson's Patent Drawing Review (PTO-948)	Paper No(s)/Mail Da	ate						
3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date	5) Notice of Informal F 6) Other:	Patent Application (PTO-152)

Art Unit: 2154

DETAILED ACTION

1. Claims 1-14 are subject to examination.

Response to Arguments

2. Applicant's arguments with respect to claims 1, 7, 13 and 14 have been considered but are moot in view of the new ground(s) of rejection.

However, Examiner would like to thank the Applicant for defining the operating system as being "Moreover, those skilled in the art would understand a multitasking function of an operating system as meaning a multitasking function performed by a software operating system, such as Windows 95. (See also, page 8, lines 13 to 18 of the subject specification.)"

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless-

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 1-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Yoshino et al. (hereinafter Yoshino) (US 6, 169, 414 B1)

Referring to claim 1,

The reference teaches an information processing apparatus for accumulating data of a measurement target (Fig. 1, element 104), said apparatus comprising:

an acquisition section, arranged to acquire the data of the measurement target by independently executing a computer program for data acquisition (col. 2, lines 5-11, col. 5, lines 21-27); and

a display section arranged to generate information to be displayed by independently executing a computer program for display information generation, on the basis of the acquired data (col. 10, lines 36-40),

wherein said acquisition section and said display section exchange data by interprocess communication. and the data acquisition computer program and the display information generation program are executed under a multitasking function of an operating system (col. 12, lines 29-35, "Furthermore, besides aforesaid functions according to the above embodiment are realized by executing the program codes which are read by a computer, the present invention includes a case where an OS (operating system) or the like working on the computer performs a part or entire processes in accordance with designations of the program codes and realizes functions according to the above embodiment.")

Referring to claim 2,

The reference teaches the apparatus according to claim 1, further comprising a recording section arranged to record data obtained by the interprocess communication on a recording medium, by independently executing a computer program for data recording executed under the multitasking function. (col. 2, lines 5-11, col. 5, lines 21-27, col. 12, lines 13-35).

Application/Control Number: 09/651,294

Art Unit: 2154

Referring to claim 3,

The reference teaches the apparatus according to claim 1, further comprising a

Page 4

communication section arranged to transfer data obtained by the interprocess

communication to another information processing apparatus connected to a network, by

independently executing a computer program for data transfer executed under the

multitasking function. (col. 10, lines 36-40)

Referring to claim 4,

The reference teaches the apparatus according to Claim 1, further comprising a

management section arranged to control operations of said acquisition and display

sections in accordance with priorities of said acquisition and display sections by

independently executing a computer program for operation control executed under the

multitasking function. (col. 5, lines 21-27, col. 2, lines 5-11, col. 12, lines 13-35).

Referring to claim 5,

The reference teaches the apparatus according to Claim 1, wherein the computer

programs of said acquisition and display sections are provided as an integrated

computer program which integrates the computer programs. (col. 12, lines 13-35, col.

10, lines 36-40)

Referring to claim 6,

The reference teaches the apparatus according to Claim 1, wherein the measurement

target is a solar battery. (Fig. 1, element 104).

Referring to claim 7,

Art Unit: 2154

Claim 7 is a claim to an information processing method carried out by the apparatus of claim 1. Therefor claim 7 is rejected for the reasons set forth for claim 1.

Referring to claim 8,

Claim 8 is a claim to an information processing method carried out by the apparatus of claim 2. Therefor claim 8 is rejected for the reasons set forth for claim 2.

Referring to claim 9,

Claim 9 is a claim to an information processing method carried out by the apparatus of claim 3. Therefor claim 9 is rejected for the reasons set forth for claim 3.

Referring to claim 10,

Claim 10 is a claim to an information processing method carried out by the apparatus of claim 4. Therefor claim 10 is rejected for the reasons set forth for claim 4.

Referring to claim 11,

Claim 11 is a claim to an information processing method carried out by the apparatus of claim 5. Therefor claim 11 is rejected for the reasons set forth for claim 5.

Referring to claim 12,

Claim 12 is a claim to an information processing method carried out by the apparatus of claim 6. Therefor claim 12 is rejected for the reasons set forth for claim 6.

Referring to claim 13,

Claim 13 is a claim to a computer program product stored on a computer readable medium comprising a computer program, for an information processing method carried out by the apparatus of claim 1. Therefore claim 13 is rejected for the reasons set forth for claim 1.

Application/Control Number: 09/651,294 Page 6

Art Unit: 2154

Referring to claim 14,

The reference teaches an information processing apparatus for accumulating data of a measurement target (Fig. 1, element 104), said apparatus comprising:

an acquisition section, arranged to acquire the data of the measurement target by independently executing a computer program for data acquisition (col. 2, lines 5-11, col. 5, lines 21-27);

a display section, arranged to generate information to be displayed by independently executing a computer program for display information generation on the basis of the acquired data supplied to the display section by the acquiring section by interprocess communication (col. 10, lines 36-40, col. 12, lines 29-35, "Furthermore, besides aforesaid functions according to the above embodiment are realized by executing the program codes which are read by a computer, the present invention includes a case where an OS (operating system) or the like working on the computer performs a part or entire processes in accordance with designations of the program codes and realizes functions according to the above embodiment.");

a recording section, arranged to record the data obtained by the interprocess communication on a recording medium, by independently executing a computer program for data recording (col. 2, lines 5-11, col. 5, lines 21-27, col. 12, lines 13-35)

a communication section, arranged to transfer data obtained by the interprocess communication to another information processing apparatus connected to a network by independently executing a computer program for data transfer (col. 10, lines 36-40); and

a management section, arranged to control operations of said acquisition

and display sections in accordance with priorities of said acquisition and display sections, by independently executing a computer program for operation control, wherein all of the computer programs of said acquisition, display, communication, and management sections are provided as an integrated computer program which integrates the independent computer programs, and the computer programs are executed under a multitasking function of an operating system. (col. 2, lines 5-11, col. 5, lines 21-27, col. 12, lines 13-35)

Conclusion

Examiner's note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the Examiner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ashok B. Patel whose telephone number is (703) 305-2655. The examiner can normally be reached on 8:00am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John A Follansbee can be reached on (703) 305-8498. The fax phone
